

## ► Installation system

### AXIS® C and AXIS® S

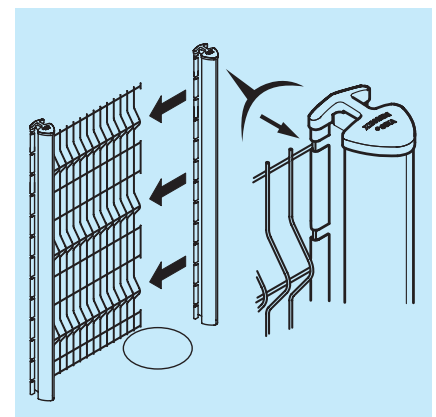

#### INSTALLATION IN FORWARD SEQUENCE

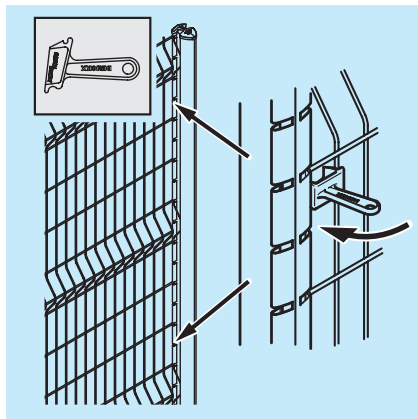

1 - Embed the first post and insert the first panel. (Swivel spikes at top and bottom.)

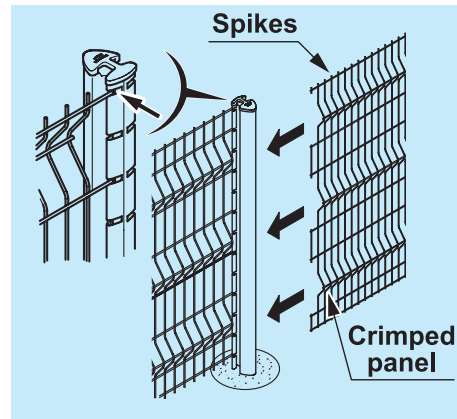

2 - Position 2 AXIS tension blocks or 2 AXOR wedges to hold the panel in position on the post while the embedding material sets.

3 - Insert the second post into the panel.

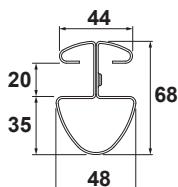

4 - Position 2 AXIS tension blocks or 2 AXOR wedges and embed the second post.

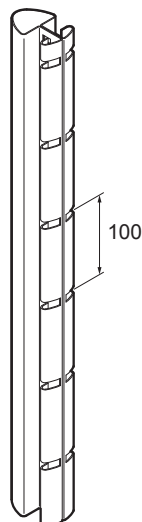

5 - Insert the second panel. Repeat operation. Once installation is complete, remove the AXIS tension blocks or the AXOR wedges (reusable).
